CONCEPTS AND BREAKTHROUGHS IN GLAUCOMA

SPONSOR BOOK

**ATLANTA, GEORGIA, USA
8 - 11 OCTOBER, 2025**

Welcome from ISER and BrightFocus

It is our great pleasure to invite you to cosponsor the **5th ISER/BrightFocus Glaucoma Symposium: Concepts and Breakthroughs in Glaucoma and BrightFocus Glaucoma Fast Track 2025!**

The **International Society for Eye Research (ISER)** and **BrightFocus Foundation** have been co-sponsors of this successful event since 2017, cooperating in delivering scientific meetings and symposia to advance our understanding and treatment of glaucoma. Attendees at this very successful meeting are clinicians and scientists that represent key opinion leaders in glaucoma research, diagnosis and treatment.

The Mission of ISER is to provide a unique international platform for discussion and exchange of ideas on contemporary topics in eye and vision research among its members and the broader eye/vision research community. This mission is standing on the ground of supporting early career researchers to develop their path towards independent researchers in the field of eye research and of bringing excellent cutting-edge research to the world. Please visit our newly revamped website, for more information on how you can become more involved, visit: <https://iser.org/>

At **BrightFocus**, our mission is to harness the power of science to end the conditions we fear most – loss of sight and loss of mind. Through BrightFocus' work on glaucoma, macular degeneration, and Alzheimer's and related dementias, we serve as an umbrella on neurodegenerative disease, uniquely positioned for scientific innovation by enabling the sharing of discoveries from one disease to inform another. For more information on our research opportunities (and to obtain free copies of lay-summary information pamphlets to share with affected individuals) please visit <https://www.brightfocus.org/> or call 1-800-437-2423.

The current meeting is built on the vibrant success of the first four meetings held on the discussion and exchange of ideas in glaucoma research and clinical application that has enabled the organizers to attract world authorities in research and clinical practice. We also make a strong effort to attract, support and include young investigators as participants in our program. The BrightFocus Glaucoma Fast Track workshop—which will be held at the beginning of the meeting—has proven to be a truly foundational experience, building a more thorough understanding of the mechanistic underpinnings of glaucoma. This further promotes our strategy of providing a solid foundation for our future scientists, clinicians and leaders. To view recordings of the prior Glaucoma Fast Track presentations, please visit BrightFocus' [YouTube account](#) where you can find 2017 videos, 2019 videos, and 2022 videos.

Symposium Success

The ISER/BrightFocus 2025 Glaucoma Symposium follows four previously successful glaucoma focused meetings held in 2013, 2017, 2019 and 2022. The ISER/BrightFocus 2022 Glaucoma Symposium hosted over 221 attendees, including young investigators, 61 of whom received travel awards. The BrightFocus Glaucoma Fast Track pre-symposium workshop hosted 153 investigators. The results of the post-symposium and workshop evaluation in 2022 showed that >90% of responders were either very satisfied or extremely satisfied with the meeting, and the quality of the sessions was above average or excellent (see below).
